EZ-Guy Wire Markers

Fact Sheet

Box of 30 Part# GWC-96-Y-B (MOQ = 1 Box)

Individual Part# GWC-96-Y (MOQ = 500)

EZ-Guy Wire Markers are high-visibility safety devices designed to make guy wires easily visible to pedestrians, workers, and equipment operators. When installed over guy wires supporting utility poles, towers, and other vertical structures, these markers help prevent accidental contact, tripping hazards, and equipment collisions. They are especially vital in rural areas where recreational vehicles travel along roadsides and in ditches.

Manufactured from durable, weather-resistant HDPE and our proprietary additives, guy wire markers are built to withstand harsh outdoor environments including UV exposure, wind, rain, and extreme temperatures. Their bright colors and bold profiles provide clear visual warning from a distance, improving safety. Easy to install and requiring zero maintenance EZ-Guy Wire Markers offer a reliable, cost-effective way to increase awareness of guy wires and reduce the risk of injuries and property damage.

DESCRIPTION:

- Easily installs in one minute
- Fits up-to 3/4" guy wire
- Standard length: 96" (Custom lengths available)
- Profile Dimensions: 1.33" x 1.61" ± .13"
- Wall Thickness: 0.0550" ± 0.005
- x3 Pre-Punched Mounting Holes: 0.40" dia, 1" from bottom
- Standard Color: Yellow (Other colors available with order qualification)
- Each unit comes with one cable tie for mounting
- Made with RhinoPoly® – our proprietary blend of thermoplastics
- Performance Temperature Range: -40 to +150°F
- Designed for 10+ years of outdoor use with our 10-year warranty
- Made in the USA
