# EZ-Guy Wire Markers

## Spec Sheet

Box of 30 Part# GWC-96-Y-B (MOQ = 1 Box)

Individual Part# GWC-96-Y (MOQ = 500)

### OVERVIEW:

Manufactured from durable, weather-resistant HDPE and proprietary additives, EZ-Guy Wire Markers are easier to install and built to withstand harsh outdoor environments. Their bright yellow color provides clear visual warning from a distance, improving safety in construction sites, roadways, utility corridors, and industrial areas.

### DESCRIPTION:

- Easily installs in one minute
- Fits up-to 3/4" guy wire
- Standard length: 96" (Custom lengths available)
- Profile Dimensions: 1.33" x 1.61" ± .13"
- Wall Thickness: 0.0550" ± 0.005
- x3 Pre-Punched Mounting Holes: 0.40" dia, 1" from bottom
- Standard Color: Yellow (Other colors available with order qualification)
- Each unit comes with one cable tie for mounting
- Made with RhinoPoly® – our proprietary blend of thermoplastics
- Performance Temperature Range: -40 to +150°F
- Minimum Order Quantity: 1 box = 30 units
- Factory-installed reflective strips are available (Call for details)
- Designed for 10+ years of outdoor use with our 10-year warranty
- Made in the USA

### PACKAGING & WEIGHTS:

- Unit Weight: 1lb
- Pallet Dimensions: 96" x 43" x 48"
- 500 units per pallet
- Pallet Weight: 665 lbs

### INSTALLATION INSTRUCTIONS:

Before installation, be sure to wear proper PPE as required by your company's regulations.

1. Ensure the pre-punched mounting holes face towards the ground.
2. Starting at the bottom and working up, begin pushing the EZ-Guy Wire Marker over the guy wire.
3. If the top of the EZ-Guy Wire Marker is unreachable, begin spinning the marker around the guy wire until the top snaps into place.
4. Fig. 1: Using the two side holes, feed the provided cable tie through the first hole ensuring it runs underneath the guy wire and out of the second hole.
5. Connect the ends of the cable tie over the center hole and sninch tight.
6. Cut off the end of the cable tie. Installation Video
