TriView Test Station Retrofit Kit Fact Sheet

Part# TSTRF _____

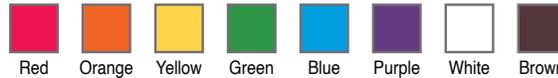

Convert your Rhino TriView® into a Test Station with the TriView Test Station Retrofit Kit™. Just remove the existing TriView cap and install the Test Station Insert with its color coded top and cap. Once the insert and new top are installed, use a screw to secure the insert in the TriView and use the optional cap lock to secure the new top.

Description:

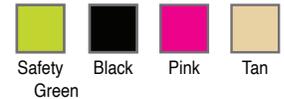

- Industry standard 11-hole terminal board
- Two internal terminals standard
- Removable cap
- Molded test station insert
- Fits standard TriView Posts
