

Hydrant Rings

Fact Sheet

Base Part# (Non-Reflective) LHM, (Reflective) LRHM

*Fully custom & standard versions shown.

Hydrant Rings provide important information to firefighters regarding the functionality and ownership of hydrants. Stock Hydrant Rings are UV and weather resistant plastic disks with printed legends. Materials are available in a variety of colors.

Hydrant Rings are easily applied in the field to the hydrant Steamer nozzle or to the smaller Hose nozzle depending on the hydrant type. The rings have various inner opening diameters to accommodate a range of nozzle sizes. Once the nozzle cap is replaced, the hydrant ring cannot be taken off until the next time the cap is removed.

DESCRIPTION:

- Reflective and Non-Reflective available
- Standard sizes Non-Reflective:
10.5" x 7" | 10.5" x 5.75" | 10.5" x 4.75" | 7.5" x 3.1"
